AUTHENEUM

Everyday we seeing how slow simple tasks like renting an apartment can be very slow and stressful as there is no digital approaches to support this everyday tasks.

Landlords can be fooled in to renting to dishonest tenants lying about their tenancy history.

Let's try to solve the problem!

Rent Instance

Charl has arrived over from South Africa. In Capetown he has 3 previous successful tenancies. However his references are just on paper so will the landlord be convinced.

Daft used Autheneum to allow the Landlord to see the verified Reference from Charl. The landlord now trusts Charl and charl then pays his deposit there and then with this Revolut payment app.

Charl and the Landlord shake hands and the landlord is now really impressed with Dafts new Authenium integration.

Game Instance

"Unity Developer James wants to make his game digital assets available across a number of game platforms"

AUTHENEUM

Autheneum is a set of Integration Tools, built on a common DAPP which helps Developers of non Blockchain platforms use Ethereum as a means of verifying whether Digital Assets are valild and verified on their platform.

"People easily know when buying digital assets on market places that the asset is verified as working on platforms."
